

International
Online Conference

**Algebraic
and Geometric
Methods of Analysis**

dedicate to the memory
of Yuriy Trokhymchuk
(17.03.1928-18.12.2019)

May 25-28, 2021
Odesa, Ukraine

LIST OF TOPICS

- Topological methods in analysis
- Geometric problems of complex and mathematical analysis
- Algebraic methods in geometry
- Differential geometry in the whole
- Geometry and topology of differentiable manifolds
- General and algebraic topology
- Geometric and topological methods in natural sciences

ORGANIZERS

- Ministry of Education and Science of Ukraine
- Odesa National Academy of Food Technologies
- Institute of Mathematics of the National Academy of Sciences of Ukraine
- Taras Shevchenko National University of Kyiv
- International Geometry Center
- Kyiv Mathematical Society

SCIENTIFIC COMMITTEE

Drozd Yu.

(Kyiv, Ukraine)

Maksymenko S.

(Kyiv, Ukraine)

Plaksa S.

(Kyiv, Ukraine)

Prishlyak A.

(Kyiv, Ukraine)

Bakhtin O.

(Kyiv, Ukraine)

Balan V.

(Bucharest, Romania)

Banakh T.

(Lviv, Ukraine)

Borysenko O.

(Kharkiv, Ukraine)

Cherevko Ye.

(Odesa, Ukraine)

Fedchenko Yu.

(Odesa, Ukraine)

Karlova O.

(Chernivtsi, Ukraine)

Kiosak V.

(Odessa, Ukraine)

Konovenko N.

(Odessa, Ukraine)

Lyubashenko V.

(Kyiv, Ukraine)

Matsumoto K.

(Yamagata, Japan)

Mormul P.

(Warsaw, Poland)

Mykhailyuk V.

(Chernivtsi, Ukraine)

Plachta L.

(Krakov, Poland)

Pokas S.

(Odessa, Ukraine)

Sabitov I.

(Moscow, Russia)

Savchenko O.

(Kherson, Ukraine)

Sergeeva A.

(Odessa, Ukraine)

Shelekhov A.

(Tver, Russia)

Zarichnyi M.

(Lviv, Ukraine)

ADMINISTRATIVE COMMITTEE

- Egorov B., chairman, rector of the ONAFT;
- Povarova N., deputy chairman, Pro-rector for scientific work of the ONAFT;
- Mardar M., Pro-rector for scientific-pedagogical work and international communications of the ONAFT;
- Fedosov S., Director of the International Cooperation Center of the ONAFT;
- Kotlik S., Director of the P.M. Platonov Educational-scientific institute of computer systems and technologies "Industry 4.0";
- Lishchenko N. Dean of faculty of the computer systems and automation ONAFT

ORGANIZING COMMITTEE

Cherevko Ye.
Eftekharinasab K.
Fedchenko Yu.
Feshchenko B.
Khohlyk O.

Klishchuk B.
Konovenko N.
Kravchenko A.
Kuznietsova I.
Maksymenko S.

Osadchuk E.
Plakosh A.
Prus A.
Sergeeva A.
Soroka Yu.

Generalized (σ, τ) -derivations on associative rings satisfying certain identities

Mehsin Jabel Atteya

(Department of Mathematics, College of Education, Al-Mustansiriyah University, Baghdad, Iraq)
E-mail: mehsinatteya88@gmail.com

The commutativity of associative rings with derivations have become one of the focus points of several authors and a significant work has been done in this direction during the last two decades. It represents the answer to the natural questions of Ring Theory which reach to determine the conditions implying commutativity of the ring. Basically, the study of derivation was initiated during the 1950s and 1960s. Derivations of rings got a tremendous development in 1957, when Posner [1] established two very striking results in the case of prime rings. A considerable amount of work has been done on derivations and related maps during the last decades (see, e.g., [2,3 and 4] and references therein). The main purpose of this paper is present results concerning generalized (σ, τ) -derivations via associative rings. Accurately, we prove the commutativity with other cases of a ring that satisfied certain conditions. These results are in the sprite of the well-known theorem of the commutativity of prime and semiprime rings with generalized derivation satisfying certain polynomial constraints. Throughout this paper, R always represents an associative ring and $Z(R)$ is its center. Let σ and τ be two mappings from R to itself. For any $x, y \in R$ we write $[x, y]_{(\sigma, \tau)}$ for the commutator $x\sigma(y) - \tau(y)x$ and $(x \circ y)_{(\sigma, \tau)}$ for anti-commutator $x\sigma(y) + \tau(y)x$.

Recall that R is semiprime if $aRa = 0$ implies $a = 0$ and R is prime if $aRb = 0$ implies $a = 0$ or $b = 0$. Every prime ring is semiprime ring but the converse is not true always. An additive mapping $d : R \rightarrow R$ is said to be an (σ, τ) -derivation of R if $d(xy) = d(x)\sigma(y) + \tau(x)d(y)$ holds for $x, y \in R$. Let σ and τ be endomorphisms of R . An additive mapping $D : R \rightarrow R$ is said to be a generalized (σ, τ) -derivation of R if there exists an (σ, τ) -derivation $d : R \rightarrow R$ of R such that $D(xy) = D(x)\sigma(y) + \tau(x)d(y)$ for all $x, y \in R$.

Theorem 1. *Let R be a non-zero semiprime ring with nonzero commutator, σ and τ be automorphsim mappings. If R admits a generalized (σ, τ) -derivation satifises the identity $D(xy) = D(x)y$ for all $x, y \in R$, then $D = 0$.*

Theorem 2. *Let R be a 2-torsion free semiprime ring with nonzero commutator, σ and τ be automorphsim mappings. If R admits a generalized (σ, τ) -derivation satisfies the identity $D(xoy) = D(x)oy - D(y)ox$ for all $x, y \in R$, then $d = 0$.*
